

Regular testing of pool water is essential for effective disinfection and pH control to ensure bather safety and comfort.

The Palintest® Pooltest 3 offers the ideal answer – a 3 parameter instrument which is quick, accurate and reliable.

Using the meter could not be simpler. First select the test parameter you wish to determine using the 'Menu' button. Place the sample plus test reagents in the tube, place in the meter and press the 'ON' button. The result is displayed instantaneously. The meter has automatic blank recognition and zero setting.

The use of innovative micro-power design means that approximately 20,000 readings can be taken before battery replacement will be required.

Palintest also offer certified Check Certificates as an optional extra. The Pooltest 3 Check Standards allow you to comply with your quality procedures.

PRODUCT INFORMATION:

SP 366 Pooltest 3 supplied in a soft carrying case
SP 366C Pooltest 3 supplied in a hard carrying case
PT 234 Pooltest 3 Check Standards

SP 366 and 366C are supplied with:

- 2 strips of 10 DPD 1 tablets
- 1 strip of 10 DPD 3 tablets
- 2 strips of 10 phenol red (pH) tablets
- 1 strip of 10 Cyanuric Acid tablets
- 2 photometer glass round test tubes

- **Ideal for routine pool monitoring**
- **Direct-reading in mg/l and pH units**
- **Simple to use**
- **Palintest tablet reagent system**

POOLTEST 3

Tests	Range	Code 50 tests	Code 250 tests
Free Chlorine	0-5 mg/l	PM 011	AP 011
Total Chlorine	0-5 mg/l	PM 031	AP 031
pH (phenol red)	6.8-8.4 units	PM 130	AP 130
Cyanuric Acid	0-200 mg/l	PM 087	AP 087

Photometer which measures:

- Chlorine
- pH
- Cyanuric Acid
